Forecast for Wednesday 29 Dec 2021

Weather: Dry overnight with cloud gradually thickening and lowering from the south. Broad area of rain, initially falling as snow above 800m, spreading from southwest during the morning, reaching all before noon. The rain will gradually weaken and clear from the south through the late afternoon and evening, with a brisk, mainly dry west to southwest flow becoming established by mid-night.

Chance of cloud free mountain/hill tops above 800m: 80% becoming 10% late morning, before improving in the clearance 70%.

Visibility: Becoming moderate or poor in rain, very poor in snow and hill fog, with bases extensive above around 500-700m on the front.

Met Office Aberdeen Meteorologist's View
Very difficult conditions in frontal weather with extensive hill fog and summit gales which brings a severe wind chill.

Forecast for Thursday 30 Dec 2021
Weather: Scattered showers at first, with a few possibly turning heavy in the west, also sporadically wintry across higher peaks. Gradually becoming drier and brighter from late morning as a ridge of high pressure builds from the south. Periods of rain extending from the south late evening and overnight.

Maximum wind: Southwest beginning mean 35-40mph with gusts reaching 55mph around most exposed ridges and summits, gradually easing from mid-morning.

Chance of cloud free mountain/hill tops above 800m: 70% becoming near 100% by mid-day, then 20% or less overnight.

Visibility: Becoming moderate or poor in rain or showers, very poor in snow and hill fog, with bases frequently lowering 500-700m in early showers, and more widespread in later rain.

Temperature: **Glens:** Plus 2 Celsius increasing 11 Celsius for afternoon
At 800m: Plus 3 Celsius
Freezing level: Around 1400m
